

101 Short Problems / 101 Problemas Cortos How many cats and canaries can fit in Ms. Jones pet shop? What does Alice experience when she revisits the Wonderland of her youth? These are two of the many intriguing questions in this fun-filled collection of short, open mathematics problems. By exploring different strategies and applying them to real-world situations, students discover that problems can be solved in more than one way. 101 Short Problems is perfect for group work, investigation starters, homework, and mathematics explorations. Topics include numerical and spatial reasoning, probability and statistics, patterns and relationships, algebraic thinking, and discrete mathematics. The problems are not complex or tricky; everybody can find a place to start. This dual English/Spanish book is invaluable for teaching math in bilingual classrooms. Grades 29. Text in both English and Spanish on matching pages, 132 pages each language; pages perforated and 3-hole punched.
