

Still counting on fingers to add and subtract? Easy Breezy Addition and Subtraction can help. Easy Breezy Addition and Subtraction builds math fluency and confidence by helping students learn addition facts and learn subtract facts by visualizing AND memorizing. People often ask, Should students learn to visualize their facts, or should they learn to memorize them instead? As it turns out, students need to do both. The more you can visualize your facts, the easier it is to memorize them. The faster you memorize your facts, the easier it is to visualize a problem. Visualizing and memorizing go hand in hand, and they work best when they work together. Four Zones for 45 Facts Make Learning Easier The Four Zones for 45 Facts break up the overwhelming addition chart into four simple zones. The facts in each of these zones have common patterns, and students learn strategies to take advantage of these patterns. This makes it easier for students to learn addition facts as well as to learn subtraction facts. Easy Breezy Addition and Subtraction, along with the online web app (one year access), helps students gain understanding, fluency, and confidence. Then, students will have a much easier time working with multi-digit addition and subtraction.
