This book was originally published prior to 1923, and represents a reproduction of an important   historical work, maintaining the same format as the original work. While some publishers have opted to   apply OCR (optical character recognition) technology to the process, we believe this leads to   sub-optimal results (frequent typographical errors, strange characters and confusing formatting) and   does not adequately preserve the historical character of the original artifact. We believe this work is culturally important in its original archival form. While we strive to adequately clean and digitally   enhance the original work, there are occasionally instances where imperfections such as blurred or   missing pages, poor pictures or errant marks may have been introduced due to either the quality of the   original work or the scanning process itself. Despite these occasional imperfections, we have brought it   back into print as part of our ongoing global book preservation commitment, providing customers with   access to the best possible historical reprints. We appreciate your understanding of these occasional   imperfections, and sincerely hope you enjoy seeing the book in a format as close as possible to that   intended by the original publisher.
